

### Request for Information – Feedback Summary Sheet

<b>Request made by:</b>	Chris Hill	<b>Responses to be sent back to:</b>	Lucy Jenkins
<b>Date request made:</b>	11/08/2020	<b>Date sent out:</b>	11/08/2020
<b>Details of Request:</b>	Does anyone use slow/ gradual turning techniques on patients that are too unstable to reposition? If so what techniques are used and what impact does this have on staffing.		
<b>No.</b>	<b>Response Received From:</b>	<b>Details of Response:</b>	
1	Gemma Millen William Harvey	Proning team role Not aware of slow/gradual turning technique	
2	Louise Barr Whiston Hospital	Rented/ purchased turning beds that allow ¼, ½ or full turns, every 30 or 60min cycles, which we found were of great use to us when patients are unstable.	
3	Jane McMullen LHCH	We do not use slow/ gradual turning techniques on patients that are too unstable to reposition. But would be interested in what it entails.	

Please complete and return this form to [Karen.berry@mft.nhs.uk](mailto:Karen.berry@mft.nhs.uk) 4 weeks following request for information.
