**D**ocument

**D**ocument

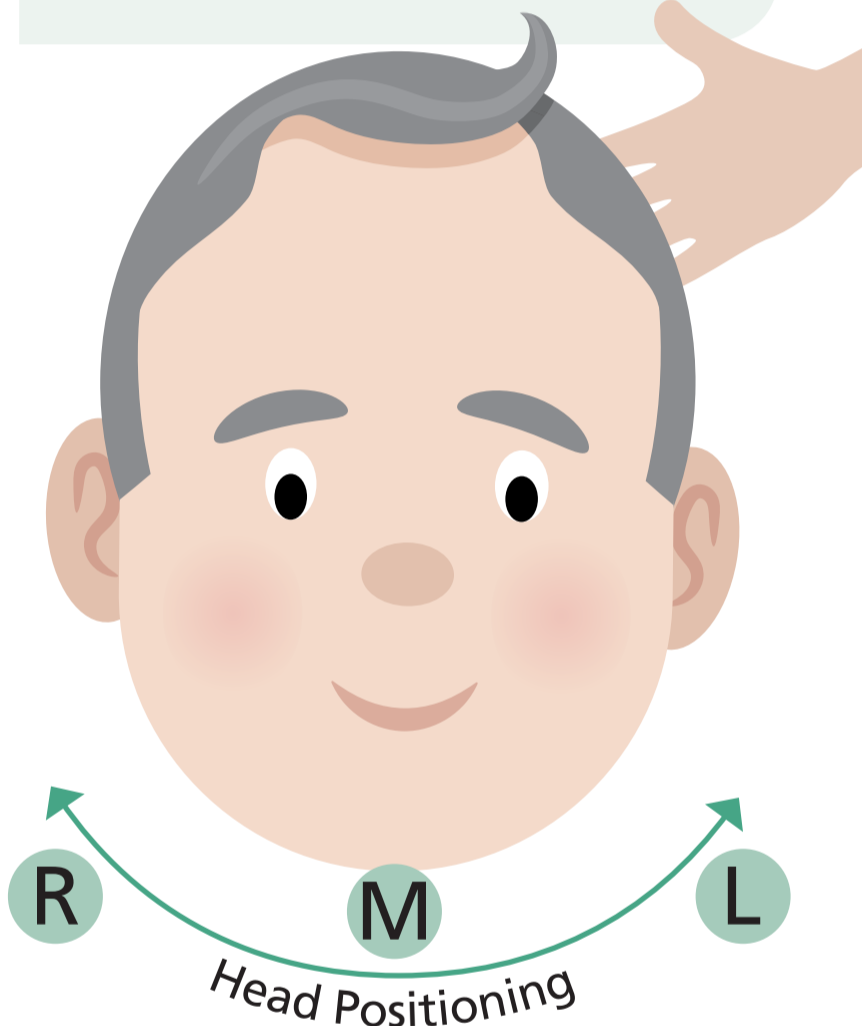

Document and describe what you see.

**A**ssess

Is your patient too unstable to reposition but their airway stable?

If so refer to ACC flow chart

Head and ET tube repositioning R M L

**H**ands on

Feel the back of the patients head.

Does it feel...

- Boggy
- Swollen
- Hot
- Hard
- Oedematous

**E**xamine

All devices should be repositioned 2 hourly.

**A**sk

Ask for advice from your link nurse....
